

Helpdesk Module – Functional Requirements Specification

1. General Overview

The Helpdesk module must be built **within the existing ERP system** and appear under the **Helpdesk tab** (not as a separate application).

The system must support:

- Manual ticket logging
- Email-based ticket logging
- Technician assignment (manual & randomized)
- Requester self-service access
- Notifications
- Scheduling
- Reporting
- Role-based permissions

Examples and screenshots will be supplied separately where referenced.

2. Home Page (Helpdesk Dashboard)

Visibility

- **Admin users** must see **all open calls** on the home page.
- Non-admin users should only see calls assigned to them.

The screenshot shows a web interface for a Helpdesk dashboard. At the top, there are two buttons: "New Request" and "Create new". Below these are three tabs: "My View", "Global View", and "Assets". The main content area is titled "Requests by Technician" and includes a "View All" button and a "Technician" dropdown menu. The table below lists technicians and their request counts across three categories: Open, OnHold, and OverDue. The "Total" row shows 85 Open, 0 OnHold, and 76 OverDue requests.

	Open	OnHold	OverDue
Lukas Janse Van Rensburg	34	0	31
Lindie Taljaard	13	0	11
Cheree Bester	12	0	12
Robert Gerry	11	0	10
Charlaine Marnewick	6	0	4
Donovan Austin	4	0	4
Tené Viljoen	3	0	2
Others	2	0	2
Unassigned	0	0	0
Total	85	0	76

Layout

- Layout example will be provided.
- Each call should display key information (subject, requester, technician, status, due date, etc.).

Actions

- Button to **Log a New Request** must be available.
-

3. New Request (Manual Ticket Logging)

Required Fields

- **Client**
 - Dropdown
 - Must pull from existing **Client Database**
 - **Requester Name**
 - Dropdown
 - Must pull from **Requesters (Admin Section)**
 - **Technician**
 - Dropdown
 - Must pull from **User Logins (Reporting & Admin)**
 - **Due By Date** (date selector)
 - **Subject**
 - **Description**
 - **File/Image Upload**
 - **Add Request** button
-

4. Technician View (When a Technician is Selected)

When opening a call assigned to a technician, the view must display:

- Subject
- Requester Name
- Due By Date (default: next working day)
- Created Date
- Helpdesk ID Number
- Notes (text field)

(Visual example will be provided.)

Subject	Requester Name	Assigned To	Group	Due By
		Lukas Janse Van Rensburg		
 DC Veeam Backup - Failed	Cheree Bester	Lukas Janse Van Rensbu ...	-	Feb 26, 2026 08:40 AM

5. Admin Section (Under Helpdesk Tab)

5.1 Mail Server Settings

Incoming Mail

- POP mail configuration
- Must function the same as existing **Backup Monitoring POP Mail**
- Used to automatically log tickets from emails

Outgoing Mail

- SMTP server configuration
- Used for notifications
- Example configuration will be provided

Incoming	Outgoing	Spam Filter
----------	----------	-------------

Outgoing Mail Settings.

* Server Name / IP Address	156.38.150.232
Alternate Server Name / IP Address	156.38.150.232
Sender's Name	Sautech Helpdesk
* Reply-to Address	Helpdesk@sautech.net
Email Type	SMTP
* Port	25

5.2 Notification Rules

- System must support configurable notification rules
- Rule layout and logic will be provided via screenshot

Email Templates

- Templates must be:
 - Customizable
 - HTML-based
 - Able to include images
- Example templates will be provided

5.3 Requester Notifications

- When a **new requester logs a call for the first time**, they must receive an email containing:
 - Self-service login link
 - Login name (email address)
 - System-generated password
 - Requesters must only be able to:
 - Log in
 - View **their own logged calls**
-

6. Scheduled Calls

Scheduled Calls List View

When opening the **Scheduled Calls** tab, display:

- Subject
 - Requester Name
 - Created Date
 - Edit option
 - Log Again option
 - Delete option
-

Add New Scheduled Call

Required Fields

- **Client** (from Client Database)
- **Requester Name** (technician selectable)
- **Technician**
- **Subject**
- **Description**
- **File/Image Upload**

Task Schedule

Must support:

- Daily
- Weekly
- Monthly
- Periodic
- One-time schedule
- **Add Request** button

(Task scheduling example will be provided.)

Task Schedule

- ☐ Daily Schedule
- ☐ Weekly Schedule
- ☐ Monthly Schedule
- ☐ Periodic Schedule
- ☒ **One Time Schedule**

One Time Task Scheduling

On

Date : 

Time : Hours : Minutes

7. Requesters Management

Requesters List View

Display:

- Name
- Email
- Work Number
- Mobile Number

Must be able to:

- Add
- Edit
- Delete requesters

This should be in the dropdown when adding/creating a call.

Add New Requester

Fields

- Client (from Client Database)
- Requester Name
- Email Address
- Work Number
- Mobile Number

Behavior

- On save:
 - Automatically create **self-service login**
 - Login name = Email Address
 - Password = Randomly generated
 - When editing a requester:
 - Must have option to **reset password**
-

8. Reports Tab

8.1 Billing Report

- Must allow selection of a **date range**
- Monthly reporting required

Report Fields

- Client
 - Helpdesk ID Number
 - Time Spent
 - Created Date
 - Closed Date
 - Technician
 - Subject
 - Worklog Description
 - Service
 - Unit Price
-

8.2 Other Reports

- **Open Call Report**
 - Export all open calls OR filter by technician
 - Date range selectable
 - **Closed Call Report**
 - Export all closed calls OR filter by technician
 - Date range selectable
 - **On Hold Call Report**
 - Export all on-hold calls
 - Must include on-hold description
 - **Overdue Call Report**
 - Export all overdue calls
-

9. Role Permissions (Reporting & Admin Section)

This does **not** fall under the Helpdesk tab.

Manage Role Permissions

Must be configurable **per user**, including:

- Create calls
 - Edit calls
 - Delete calls
 - Merge calls
 - Close calls
 - Randomize assignment
 - Time sheet access
 - Manual time entry
 - Assign & reassign calls
-

Randomized Assignment Logic

- If a user has **Randomize** permission:
 - Calls logged manually or via email must be automatically assigned
 - Assignment must rotate between selected users
 - User with **least open calls** should be prioritized
-

10. Technician Call Actions

When a technician opens a call, the following must be available:

Call Status

- Dropdown:
 - Close
 - On Hold

Description

- Text field
- This description is **sent to the client**

Worklog

- Checkbox: *Add to Worklog*
- Worklog entries:
 - Must **not be visible to the client**

Time Sheet

- Start Time
- End Time
- Users with timesheet permission:
 - **Must not be allowed to close calls without time entered**
 - **Time should not be altered, must use start and end time button (Play & Pause buttons)**

Service & Pricing

- Service Category
 - Pulled from **Admin Services – Manage Service Categories**
- Unit Price
 - Pulled from **Admin Services – Unit Price**

Worklog Description

- Internal text field (not client-facing)
-

On Hold Rules

- When setting a call to **On Hold**:
 - Description/Note is mandatory
 - Client must **not receive an email notification**
-

11. Overdue Call Logic

- Calls logged manually or via email:
 - Must only be marked **Overdue after 48 working hours**
 - Working hours are **Monday to Friday only**
 - Weekends must be excluded from calculation
