TABLE OF CONTENTS 2

1. High-Level Outline of Disaster Recovery & failover Process 3

2. Key Personnel and Contact Information..... 3

3. sautech helpdesk procedure 3

4. Scenario 1 – Failover to replication server 4

5. Scenario 3 - disaster recovery Procedure 4

1. HIGH-LEVEL OUTLINE OF DISASTER RECOVERY & FAILOVER PROCESS

These are the major goals of the disaster recovery procedure.

- To minimize interruptions to the normal operations.
- To limit the extent of disruption and damage.
- To minimize the economic impact of the interruption.
- To establish alternative means of operation in advance.
- To provide for smooth and rapid restoration of service.

2. KEY PERSONNEL AND CONTACT INFORMATION

These are the key resources involved in the disaster recovery plan, including all key stakeholders and third-party resources.

SAUTECH NAME & TITLE	ROLE	PHONE	EMAIL
Mr. Lukas Janse Van Rensburg	Sautech Head of IT		lukas@sautech.net
Ms. Cheree Swart	Sautech Backups		cheree@sautech.net
Mr. Robert Gerry	Sautech Technician		robert@sautech.net
CLIENT NAME & TITLE	ROLE	PHONE	EMAIL

3. SAUTECH HELPDESK PROCEDURE

All support requests have to be logged via Sautech helpdesk

All support requests to Sautech can be logged by sending an email to our helpdesk email address below. The sender will receive an automated acknowledgement response email from the system which includes all the details of the request logged. In this email there is also a link whereby the requester can track the progress of the request.

Selected staff is monitoring the Helpdesk and assigns the incoming requests to the relevant technicians

- Sautech helpdesk email address helpdesk@sautech.net
- Sautech Office Number: 011 768 1790

4. SCENARIO 1 – FAILOVER TO REPLICATION SERVER

These are the key components in the event of a planned failover.

Scenario examples for a requested failover below but are not subjected to:

- Application Malfunction
- Data Loss
- Configuration Mismatch

Should the need arise to perform a failover the following procedure is required.

4.1 Failover Performed by Sautech

- Log a call as per above Helpdesk Procedure (Section 3)
- A Planned failover will be performed as follows by Sautech.
- Live environment will be shutdown.
- Recovery points will be discussed with the client whereby the client is to specify the preferred recovery point.

When the failover server successfully started, the technician will notify the client in order to test.

Once successful operation has been confirmed, the reverse replication will be enabled depending on the scenario.

5. SCENARIO 3 - DISASTER RECOVERY PROCEDURE

These are the key components in the DRP that should be immediately addressed and acted upon in the event of emergency.

Should a DR call be made in case of a disaster the process is as follows:

- Log a call to helpdesk@sautech.net as per point 3 above.
- Sautech will start the DR server.
- iPin to change DNS records.
- Sautech will contact iPin Seta for testing purposes.
- Sautech to Investigate the primary DC failure.

5.2 DNS Record Changes:

- iPin to change www.ipingroup.com DNS Records to the following IP: 129.232.196.15
