1. INTRODUCTION

The purpose of this document is to describe the Progressive Data Solutions Replications and Backups, with processes and a how to guides.

2. MICROSOFT HYPER-V REPLICATIONS

- § Progressive Data Solutions has two sets of Replications.
- § Primary Replications that acts as a failover within the same Datacentre.
- § Secondary Replication (DR) that acts as a failover to a 2nd Datacentre.

3. MICROSOFT HYPER-V PRIMARY REPLICATION

- § Progressive Data Solutions has two servers at MTN Gallo Manor (Afrihost), the Primary and Secondary Server.
- § On the Primary Server there are two Virtual Machines which are replicated to the 2nd Server with incrementals of every 15min and total of 24 restore points.

Choose the frequency at which changes will be sent to the Replica server.

15 Minutes

Configure additional recovery points for this virtual machine

☐ Maintain only the latest recovery point

☒ Create additional hourly recovery points

Coverage provided by additional recovery points (in hours): 24

☒ Volume Shadow Copy Service (VSS) snapshot frequency (in hours): 12

This option requires the latest Integration Components be installed in the guest. For non-Windows guest operating systems, these snapshots are file-system consistent.

4. PRIMARY REPLICATION FAILOVER

- § Primary Failover will occur if the following applies:
 - Virtual Machine Failure
 - Windows Updates Failure (which caused Server not to start)
 - Application Failure
 - Databases Deleted / Corrupted
 - Primary Server Failure
- § Acting Company Responsible for calling Primary Replication Failover = Sautech

5. DR REPLICATION FAILOVER

- ↪ DR Failover will occur if the following applies:
 - MTN Gallo Manor (Afrihost) is completely down
 - Primary and Secondary Server complete Failure
- ↪ Additional conditions apply for calling DR Replication Failover:
 - Progressive Data Solutions DR policy should be in effect and active
 - DR Failover will occur in a certain period that is stipulated in the DR policy of Progressive Data Solutions
 - When there is no way of restoring the Primary Services within the time frame of the DR policy of Progressive Data Solutions
- ↪ Acting Company Responsible for calling DR Replication Failover = Progressive Data Solutions

6. BACKUP FAILOVER

- ↪ Backup Failover will occur if the following applies:
 - All data is missing exceeding the time frame of available Primary and DR Replications
 - Data Encryption with all Primary and DR replications infected
 - Acting Company Responsible for calling DR Replication Failover = Progressive Data Solutions

7. INFRASTRUCTURE DIAGRAM
