Sautech Damage Report

Client Name Randfontein High School
Technician Name Robert and Donovan
Date 29 July 2016
Asset Serial Number See the attached list.

Description of Damage

We have tested and found that the power supplies on all the machines on the list attached have been damaged due to the Power surge that occurred on your premises and needs to be replaced. Further more we cannot guarantee that once the power supplies have been replaced that the pc's will be 100% in working order as other components might have been damaged as well. However it is highly likely that only the power supplies are damaged according to our findings.

Damage Report Completed by:
