1. Next generation anti-virus and/or anti-malware software implemented on all desktops, laptops and **Sensitive systems** (where applicable and in accordance with best practice recommendations) and kept up to date as per the software providers' recommendations.
2. Security related patches and updates applied on **Sensitive systems** within 3 (three) months of release by the provider.
3. Outdated software which is no longer supported by the software provider is not accessible from external networks and is disclosed to the **Insurer**.
4. Password controls implemented on **Sensitive systems**. These controls must include:
  - 4.1 Password length of at least 10 (ten) characters.
  - 4.2 User account passwords changed at least every 120 (one hundred and twenty) days unless passwords are at least 14 (fourteen) characters in length or multi factor authentication is implemented.
  - 4.3 Passwords prevented from being reused for at least 5 password changes.
  - 4.4 Passwords configured which are not common dictionary words and cannot within reason be deemed widely used or easily guessable e.g. including the **Insured's** name or P@ssword1.
  - 4.5 User accounts configured to lockout because of at most 10 (ten) failed authentication attempts.
  - 4.6 All default installation and administration accounts secured via changing the account password from the well-known default passwords and/or disabling, deleting or renaming the account.
5. User privileges for users with access to **Sensitive systems** and **Sensitive information** must be revoked within thirty (30) days of termination of employment at the **Insured** and where notified, for termination of employment at a service provider.
6. Resiliency controls including:
  - 6.1 Documented disaster recovery and business continuity plans.
  - 6.2 Generate backups at least weekly or have replication implemented.
  - 6.3 At any point in time have a backup or replicated copy which is disconnected, offline or cannot be overwritten from the production environment.
  - 6.4 Monitor for or test to ensure the successful generation of backups or replication.
  - 6.5 Test the ability to restore data from backups or read from replicated copies at least every six (6) months.

If the **Insured's Computer System** includes a company network:

7. Next generation firewalls with geo-location blocking configured to restrict access to digitally stored **Sensitive information**.
8. Generally accepted vulnerable network protocols are secured via disabling/blocking on the firewall or where required restricted based on IP address and/or to secured areas.
9. Administrative/remote access interfaces such as Remote Desktop Protocol (RDP) are not accessible via the open internet. Where such interfaces are required these are accessible exclusively over secured channels such as multi-factor authenticated Virtual Private Network (VPN) connections.
10. The system and/or activity logs for all **Sensitive systems** including firewalls and Active Directory as implemented in the **Insured's** environment stored for a minimum period of 6 (six) months.

**Sensitive systems** means all systems (including all hardware, software and physical components thereof and the data stored thereon) visible to external networks and/or used to store/process **Sensitive information**.

**Sensitive information** means

- a) any confidential or proprietary non-public information of the insured or third parties, including but not limited to trade secrets, know how, intellectual property including but not limited to patents, copyrights and trademarks, computer programs or customer information; or
- b) any confidential non-public information relating to a natural person, including but not limited to payment card, banking, financial, contact and medical information.

We trust you find the above in order. Should you have any additional requests and/or questions, please contact ITOO
