

Exchange Manual Setup

28 September 2019

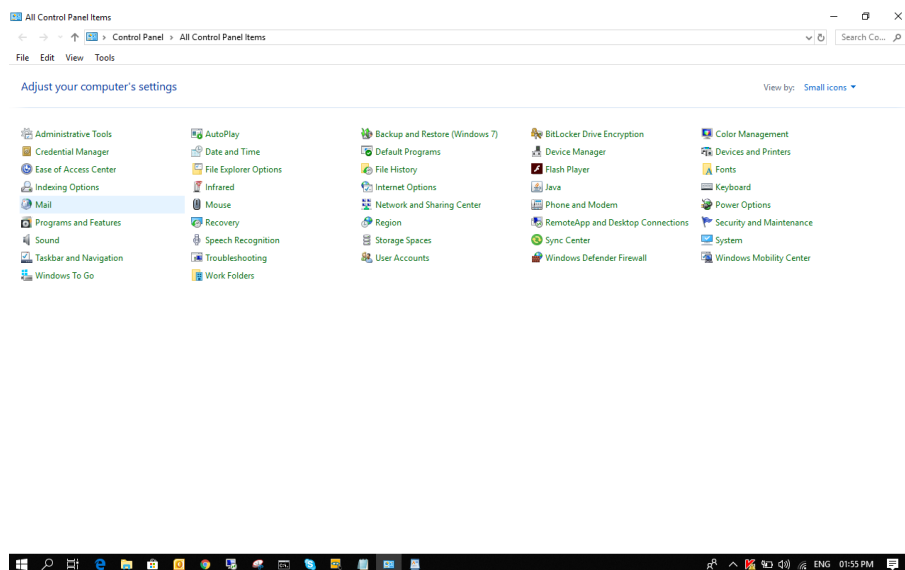

1 INTRODUCTION

The purpose of this document is to provide a complete step-by-step installation manual to configure your online hosted exchange profile. After all procedures in this document is followed completely, you will be able to connect to your new hosted exchange account using Microsoft Office 2003 and above.

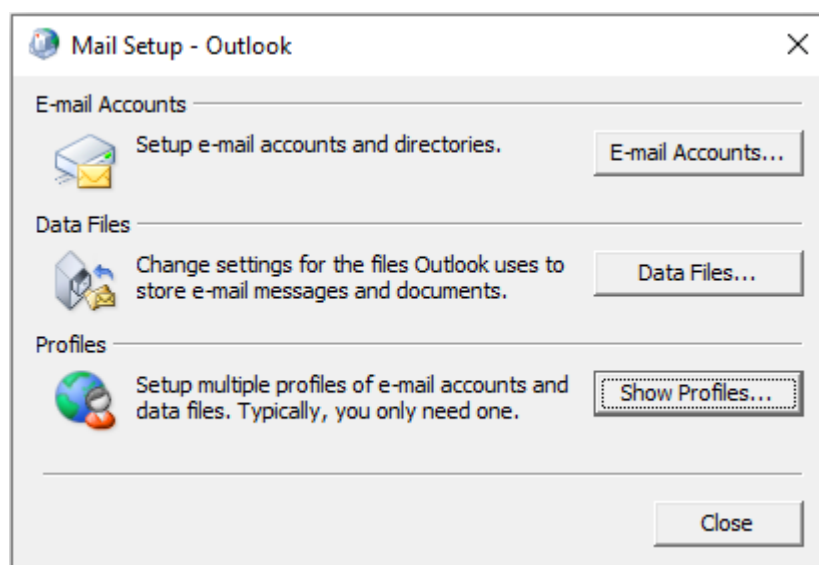

2 OUTLOOK SETUP

This procedure will help you configure your Microsoft outlook to be able to connect to the exchange server:

1. Click on **Start -> control panel**, once opened , double click the **“Mail”** icon

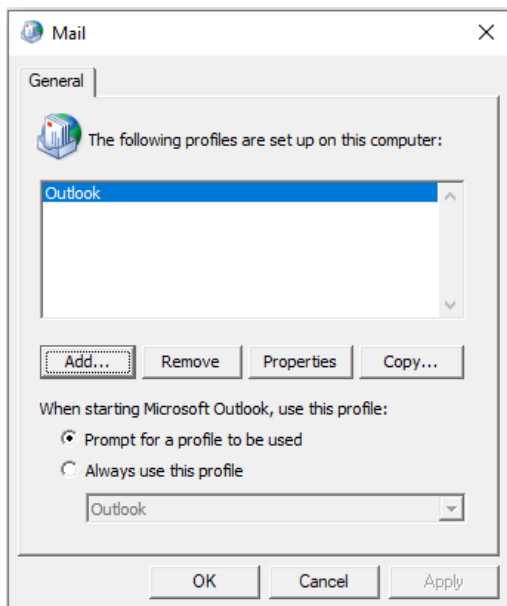

2. Click on **“Show Profiles”**

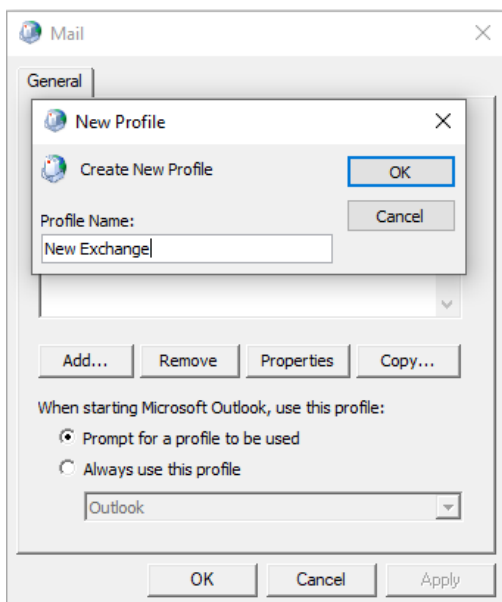

3. Click on “Add”

Make sure “**prompt for a profile to be used**” is selected (When we finish this process, and start outlook, you can select your old email or the newly created Exchange profile)

4. Type a name in the profile window “example: “**New Exchange**” and click on “ok”

5. Select the **Manually configure** tick box, and click “next”

Add New Account

Auto Account Setup
Connect to other server types.

☐ **E-mail Account**

Your Name:
Example: Ellen Adams

E-mail Address:
Example: ellen@contoso.com

< Back **Next >** Cancel

7. In the server window type: **exchange2016c.onlinehosting.isp**
8. In the User Name window type in your full Email Address
9. Click on **More Settings**

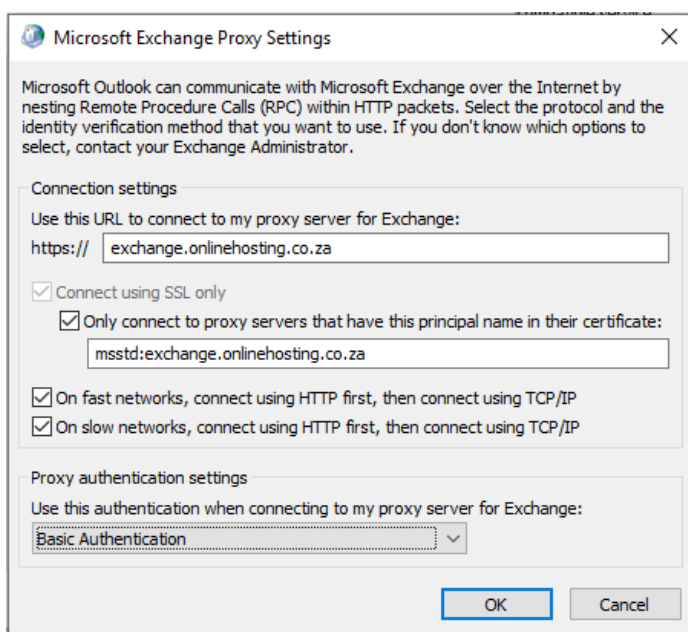

The screenshot shows the 'Add New Account' dialog box with the 'Server Settings' tab selected. The title bar says 'Add New Account'. Below the title bar, it says 'Server Settings' and 'Enter the information required to connect to Microsoft Exchange or a compatible service.' There are two input fields: 'Server' with the text 'exchange2016c.onlinehosting.isp' and 'User Name' with the text 'Example'. A checkbox labeled 'Use Cached Exchange Mode' is checked. A 'Check Name' button is next to the User Name field. A 'More Settings...' button is at the bottom right. At the bottom of the dialog are '< Back', 'Next >', and 'Cancel' buttons.

10. Go to the **Connection** Tab - Tick "**Connect to Microsoft Exchange using HTTP**" then click on "**Exchange Proxy Settings**"

The screenshot shows the 'Microsoft Exchange' dialog box with the 'Connection' tab selected. The title bar says 'Microsoft Exchange'. There are four tabs: 'General', 'Advanced', 'Security', and 'Connection'. The 'Connection' tab is active. It contains a section 'Connection' with the text 'Use these settings when connecting to Microsoft Exchange when working offline:'. There are three radio buttons: 'Connect using my Local Area Network (LAN)' (selected), 'Connect using my phone line', and 'Connect using Internet Explorer's or a 3rd party dialer'. Below this is a 'Modem' section with the text 'Use the following Dial-Up Networking connection:' and a dropdown menu. There are 'Properties...' and 'Add...' buttons. At the bottom is an 'Outlook Anywhere' section with a checkbox 'Connect to Microsoft Exchange using HTTP' which is checked. Below this checkbox is an 'Exchange Proxy Settings...' button. At the bottom of the dialog are 'OK', 'Cancel', and 'Apply' buttons.

11. In the “Use this URL to connect to my proxy server for Exchange” window type: exchange.onlinehosting.co.za
12. Make a tick next to “Only connect to proxy server that have the principle name in their certificate” and type in the window: msstd:exchange.onlinehosting.co.za
13. Tick: On fast network, connect using HTTP first, then connect using TCP/IP box
14. Tick: On Slow network, connect using HTTP first, then connect using TCP/IP box.
15. Under Use this authentication when connecting to my proxy server for Exchange: Select “Basic Authentication”
16. Click on “OK”

17. Click on **Ok**, **Ok** again, **Next** then **Finish**

You Are Done!

When you open Outlook for the first time, the following logon information box will be displayed. Enter your full e-mail address and password supplied. Tick the “**Remember my credentials**” box.
