

Vulnerability Assessment
(VA) Report

Johanson IT Solutions T/A
Progressive Data Solutions

05 October 2023

TABLE OF CONTENTS

1	EXECUTIVE SUMMARY	3
2	SCOPE OF TESTING	3
3	METHODOLOGIES USED	3
3.1	NESSUS	3
3.2	GREENBONE ENTERPRISE	3
4	STAY ONE STEP AHEAD OF ATTACKERS	4
5	INFRASTRUCTURE.....	4
5.1	AFRIHOST SERVER – 41.76.212.56	4
6	REPORTING CONCLUSION	6
7	AUDITORS	6

1 EXECUTIVE SUMMARY

The purpose of this assessment was to point out security loopholes, business logic errors, and missing best security practices. The tests were carried out assuming the identity of an attacker or a malicious user but, no harm was made to the functionality or working of the application / network. A full scan was also performed on the infrastructure to demonstrate a known attack, i.e. someone on the internal network or same public subnetted infrastructure. The scans were performed over 2 (two) business days, as full and slow comprehensive audits were performed. These types of scans also look at unknown connectivity options, including packet SYN requests.

The overall results will be published below, Sautech is comfortable and happy with the results.

2 SCOPE OF TESTING

Security assessments include testing for security loopholes in the scope defined below. Apart from the following, no other information was provided. Nothing was assumed at the start of the security assessment. The following scope of servers were covered under the security audit:

- Server hosted at Afrihost – 41.76.212.56

3 METHODOLOGIES USED

Sautech performed various audit techniques that includes the following:

3.1 Nessus

Nessus is a remote security scanning tool, which scans a computer and raises an alert if it discovers any vulnerabilities that malicious hackers could use to gain access to any computer you have connected to a network. It does this by running over 1200 checks on a given computer, testing to see if any of these attacks could be used to break into the computer or otherwise harm it.

3.2 Greenbone Enterprise

Greenbone is the world's most widely used vulnerability management provider.

4 STAY ONE STEP AHEAD OF ATTACKERS

IT security is a process – Open Source vulnerability management provides the foundation. Once you know where the chinks are in your armor, you can do something about them.

The process – from recognition to remedy and monitoring – represents a continuous cycle. You'll always be one step ahead of attackers.

5 INFRASTRUCTURE

5.1 Afrihost Server – 41.76.212.56

We have performed three types of scans / attacks on the production server namely:

- Vulnerability Assessments.

i) Vulnerability Assessment

Multiple technologies were used to perform a vulnerability assessment, below is the summarised version of the relevant results:

We have attached the below “highlight” in a separate report so that you can click on the “Plugin” link to get the resolution.

41.76.212.56

Vulnerabilities

Total: 16

SEVERITY	CVSS V3.0	PLUGIN	NAME
INFO	N/A	10114	ICMP Timestamp Request Remote Date Disclosure
INFO	N/A	166602	Asset Attribute: Fully Qualified Domain Name (FQDN)
INFO	N/A	45590	Common Platform Enumeration (CPE)
INFO	N/A	54615	Device Type
INFO	N/A	12053	Host Fully Qualified Domain Name (FQDN) Resolution
INFO	N/A	11219	Nessus SYN scanner
INFO	N/A	19506	Nessus Scan Information
INFO	N/A	11936	OS Identification
INFO	N/A	70657	SSH Algorithms and Languages Supported
INFO	N/A	149334	SSH Password Authentication Accepted
INFO	N/A	10881	SSH Protocol Versions Supported
INFO	N/A	153588	SSH SHA-1 HMAC Algorithms Enabled
INFO	N/A	10267	SSH Server Type and Version Information
INFO	N/A	22964	Service Detection
INFO	N/A	25220	TCP/IP Timestamps Supported
INFO	N/A	10287	Traceroute Information

* indicates the v3.0 score was not available; the v2.0 score is shown

6 REPORTING CONCLUSION

From a Hosted Infrastructure point of view, we are happy with the results.

Two addendum reports are attached to this report and should be read as one document.

With the following tests performed:

- Vulnerability assessment on CVE

7 AUDITORS

These audits were concluded over a period of two days.

We hereby confirm that the above information is true and correct:

06th October 2023 – Krugersdorp, South Africa

Lukas Janse van Rensburg
Security Engineer
