5.1	41.205.135.125.....	5
5.2	160.242.99.33.....	6
5.3	160.242.114.178.....	7
5.4	197.188.226.212.....	7
5.5	197.188.235.242.....	8
6	REPORTING CONCLUSION	8
7	AUDITORS	9

1 EXECUTIVE SUMMARY

The purpose of this assessment was to point out security loopholes, business logic errors, and missing best security practices. The tests were carried out assuming the identity of an attacker or a malicious user but, no harm was made to the functionality or working of the application / network. A full scan was also performed on the infrastructure to demonstrate a known attack, i.e. someone on the internal network or same public subnetted infrastructure. The scans and were performed over 6 (six) business days, as full and slow comprehensive audits were performed. These types of scans also look at unknown connectivity options, including packet SYN requests.

The overall results will be published below. Some recommendations however, is offered and also mentioned throughout this document.

2 SCOPE OF TESTING

Security assessments include testing for security loopholes in the scope defined below. Apart from the following, no other information was provided. Nothing was assumed at the start of the security assessment. The following scope of servers were covered under the security audit:

- Server hosted on-prem – 41.205.135.125
- Server hosted on-prem – 160.242.99.33
- Server hosted on-prem – 160.242.114.178
- Server hosted on-prem – 197.188.226.212
- Server hosted on-prem – 197.188.235.242

3 METHODOLOGIES USED

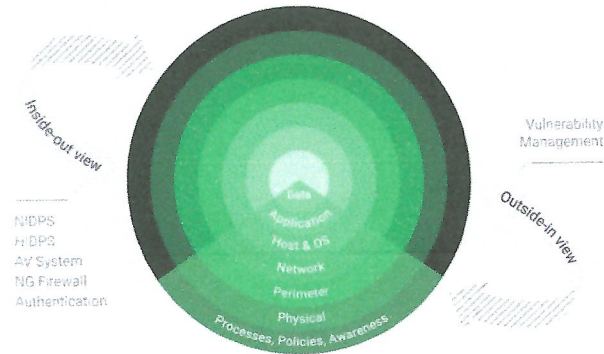

Sautech performed various audit techniques that includes the following:

3.1 Nessus

Nessus is a remote security scanning tool, which scans a computer and raises an alert if it discovers any vulnerabilities that malicious hackers could use to gain access to any computer you have connected to a network. It does this by running over 1200 checks on a given computer, testing to see if any of these attacks could be used to break into the computer or otherwise harm it.

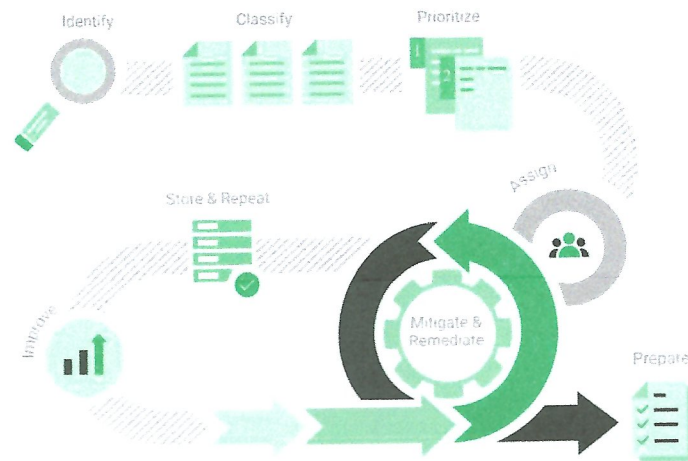

3.2 Greenbone Enterprise

Greenbone is the world's most widely used vulnerability management provider.

4 STAY ONE STEP AHEAD OF ATTACKERS

IT security is a process – Open Source vulnerability management provides the foundation. Once you know where the chinks are in your armor, you can do something about them.

The process – from recognition to remedy and monitoring – represents a continuous cycle. You'll always be one step ahead of attackers.

5 INFRASTRUCTURE

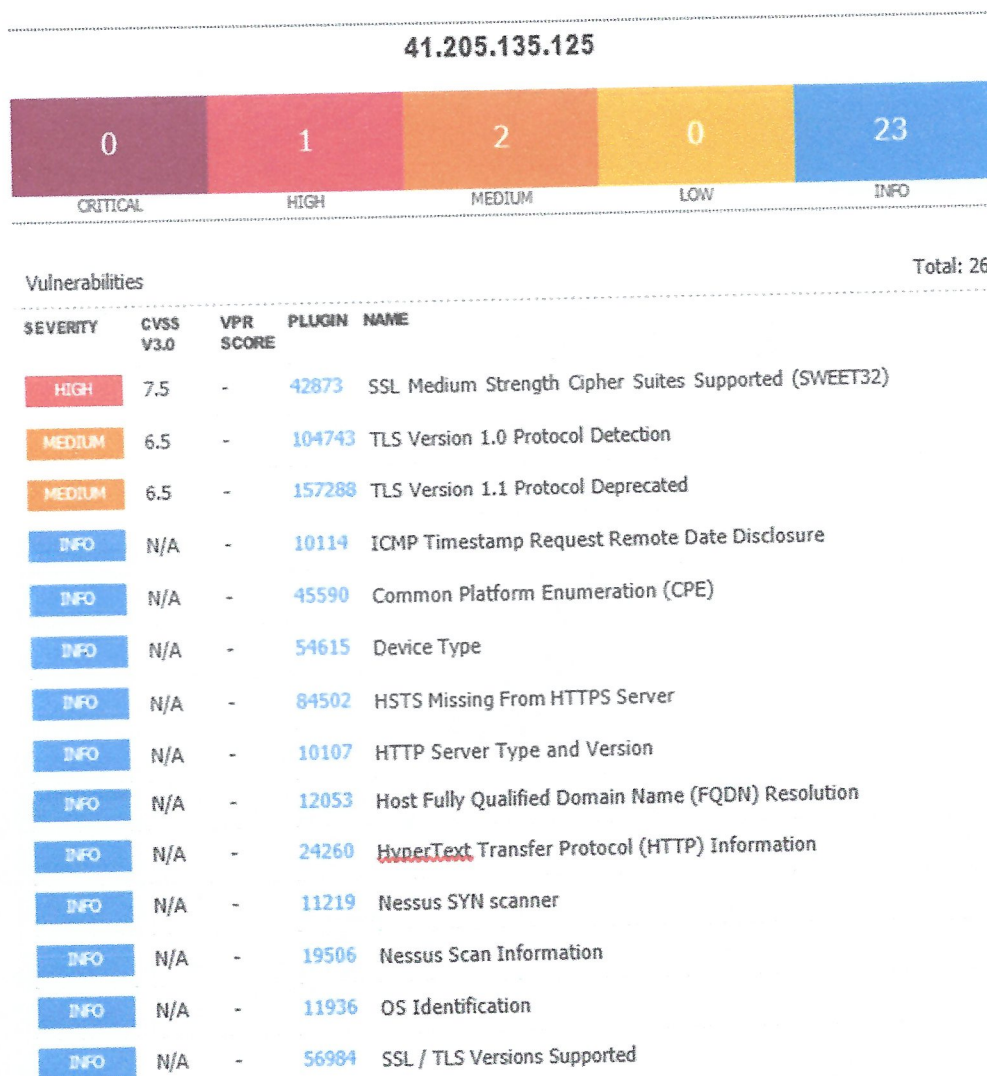

We have performed the following scans / attacks on the five production servers namely:

Vulnerability Assessment

Multiple technologies were used to perform a vulnerability assessment, below is the summarised version of each of the relevant results for each server:

We have attached the below "highlight" in separate reports so that you can click on the "Plugin" link to get the resolution.

5.1 41.205.135.125

INFO	N/A	-	45410	SSL Certificate 'commonName' Mismatch
INFO	N/A	-	10863	SSL Certificate Information
INFO	N/A	-	70544	SSL Cipher Block Chaining Cipher Suites Supported
INFO	N/A	-	21643	SSL Cipher Suites Supported
INFO	N/A	-	57041	SSL Perfect Forward Secrecy Cipher Suites Supported
INFO	N/A	-	94761	SSL Root Certification Authority Certificate Information
INFO	N/A	-	156899	SSL/TLS Recommended Cipher Suites
INFO	N/A	-	22964	Service Detection
INFO	N/A	-	84821	TLS ALPN Supported Protocol Enumeration
INFO	N/A	-	121010	TLS Version 1.1 Protocol Detection
INFO	N/A	-	136318	TLS Version 1.2 Protocol Detection
INFO	N/A	-	10287	Traceroute Information

5.2 160.242.99.33

160.242.99.33

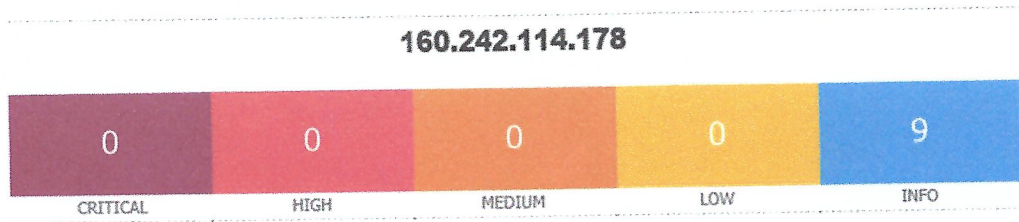

Vulnerabilities

Total: 3

SEVERITY	CVSS V3.0	VPR SCORE	PLUGIN NAME
INFO	N/A	-	10114 ICMP Timestamp Request Remote Date Disclosure
INFO	N/A	-	19506 Nessus Scan Information
INFO	N/A	-	10287 Traceroute Information

5.3 160.242.114.178

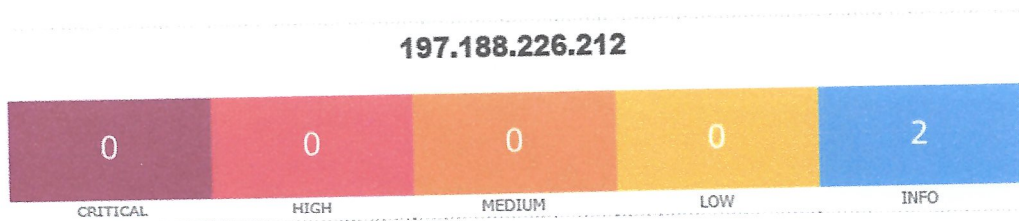

Vulnerabilities

Total: 9

SEVERITY	CVSS V3.0	VPR SCORE	PLUGIN	NAME
INFO	N/A	-	10114	ICMP Timestamp Request Remote Date Disclosure
INFO	N/A	-	45590	Common Platform Enumeration (CPE)
INFO	N/A	-	54615	Device Type
INFO	N/A	-	11219	Nessus SYN scanner
INFO	N/A	-	19506	Nessus Scan Information
INFO	N/A	-	11936	OS Identification
INFO	N/A	-	22964	Service Detection
INFO	N/A	-	25220	TCP/IP Timestamps Supported
INFO	N/A	-	10287	Traceroute Information

5.4 197.188.226.212

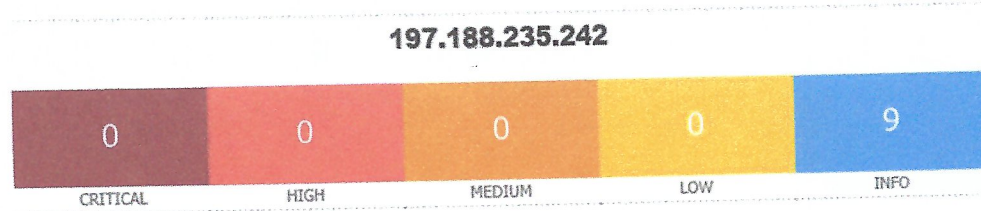

Vulnerabilities

Total: 2

SEVERITY	CVSS V3.0	VPR SCORE	PLUGIN	NAME
INFO	N/A	-	19506	Nessus Scan Information
INFO	N/A	-	10287	Traceroute Information

5.5 197.188.235.242

Total: 9

Vulnerabilities				
SEVERITY	CVSS V3.0	VPR SCORE	PLUGIN	NAME
INFO	N/A	-	10114	ICMP Timestamp Request Remote Date Disclosure
INFO	N/A	-	45590	Common Platform Enumeration (CPE)
INFO	N/A	-	54615	Device Type
INFO	N/A	-	11219	Nessus SYN scanner

INFO	N/A	-	10287	Traceroute Information

6 REPORTING CONCLUSION

Based on the reports, it is best to attach these separate to the reporting document. These reports can then be shared with the relevant contractors and/or support personnel to implement the changes and updates.

Ten addendum reports are attached to this report and should be read as one document.

With the following test performed:

- External HTTP and Port exploits
- Vulnerability assessment on CVE
- Penetration testing on login ports i.e.: ssh open

7 AUDITORS

These audits were concluded over a period of 6 (six) days.
We hereby confirm that the above information is true and correct:
