

Vulnerability Assessment & Penetration Testing (VAPT) Report

Elula

21st February 2025

TABLE OF CONTENTS

1	EXECUTIVE SUMMARY	3
2	SCOPE OF TESTING	3
3	METHODOLOGIES USED	3
3.1	NESSUS	3
3.2	GREENBONE ENTERPRISE	3
4	STAY ONE STEP AHEAD OF ATTACKERS	4
5	INFRASTRUCTURE	4
5.1	156.38.150.184.....	4
6	REPORTING CONCLUSION	6
7	AUDITORS	6

1 EXECUTIVE SUMMARY

The purpose of this assessment was to point out security loopholes, business logic errors, and missing best security practices. The tests were carried out assuming the identity of an attacker or a malicious user but, no harm was made to the functionality or working of the application / network. A full scan was also performed on the infrastructure to demonstrate a known attack, i.e. someone on the internal network or same public subnetted infrastructure. The scans were performed over 4 (four) days, as full and slow comprehensive audits were performed. These types of scans also look at unknown connectivity options, including packet SYN requests.

The overall results will be published below.

2 SCOPE OF TESTING

Security assessments include testing for security loopholes in the scope defined below. Apart from the following, no other information was provided. Nothing was assumed at the start of the security assessment. The following scope of servers were covered under the security audit:

- Server hosted at Xneelo - 156.38.150.184

3 METHODOLOGIES USED

Sautech performed various audit techniques that includes the following:

3.1 Nessus

Nessus is a remote security scanning tool, which scans a computer and raises an alert if it discovers any vulnerabilities that malicious hackers could use to gain access to any computer you have connected to a network. It does this by running over 1200 checks on a given computer, testing to see if any of these attacks could be used to break into the computer or otherwise harm it.

3.2 Greenbone Enterprise

Greenbone is the world's most widely used vulnerability management provider.

4 STAY ONE STEP AHEAD OF ATTACKERS

IT security is a process – Open Source vulnerability management provides the foundation. Once you know where the chinks are in your armor, you can do something about them.

The process – from recognition to remedy and monitoring – represents a continuous cycle. You'll always be one step ahead of attackers.

5 INFRASTRUCTURE

5.1 156.38.150.184

We have performed the following type of scans / attacks on the production server namely:

- Vulnerability Assessments

i) Vulnerability Assessment

Multiple technologies were used to perform a vulnerability assessment, below is the summarised version of the relevant results:

Vulnerabilities

Total: 32

SEVERITY	CVSS V3.0	VPR SCORE	EPSS SCORE	PLUGIN	NAME
HIGH	7.5	5.1	0.0398	42873	SSL Medium Strength Cipher Suites Supported (SWEET32)
MEDIUM	6.5	-	-	51192	SSL Certificate Cannot Be Trusted
MEDIUM	6.5	-	-	57582	SSL Self-Signed Certificate
MEDIUM	6.5	-	-	104743	TLS Version 1.0 Protocol Detection
MEDIUM	6.5	-	-	157288	TLS Version 1.1 Deprecated Protocol
LOW	2.1*	2.2	0.8939	10114	ICMP Timestamp Request Remote Date Disclosure
INFO	N/A	-	-	45590	Common Platform Enumeration (CPE)
INFO	N/A	-	-	54615	Device Type
INFO	N/A	-	-	35716	Ethernet Card Manufacturer Detection
INFO	N/A	-	-	86420	Ethernet MAC Addresses
INFO	N/A	-	-	84502	HSTS Missing From HTTPS Server
INFO	N/A	-	-	10107	HTTP Server Type and Version
INFO	N/A	-	-	12053	Host Fully Qualified Domain Name (FQDN) Resolution
INFO	N/A	-	-	84047	Hyper-V Virtual Machine Detection
INFO	N/A	-	-	50845	OpenSSL Detection
INFO	N/A	-	-	56984	SSL / TLS Versions Supported
INFO	N/A	-	-	45410	SSL Certificate 'commonName' Mismatch
INFO	N/A	-	-	10863	SSL Certificate Information
INFO	N/A	-	-	70544	SSL Cipher Block Chaining Cipher Suites Supported
INFO	N/A	-	-	21643	SSL Cipher Suites Supported
INFO	N/A	-	-	57041	SSL Perfect Forward Secrecy Cipher Suites Supported
INFO	N/A	-	-	156899	SSL/TLS Recommended Cipher Suites
INFO	N/A	-	-	22964	Service Detection
INFO	N/A	-	-	84821	TLS ALPN Supported Protocol Enumeration
INFO	N/A	-	-	121010	TLS Version 1.1 Protocol Detection
INFO	N/A	-	-	136318	TLS Version 1.2 Protocol Detection
INFO	N/A	-	-	10287	Traceroute Information

* indicates the v3.0 score was not available; the v2.0 score is shown

6 REPORTING CONCLUSION

Two addendum reports are attached to this report and should be read as one document.

With the following test performed:

- Network scanning
- Knows network attack (from Internet to the FW)
- External HTTP and Port exploits
- Vulnerability assessment on CVE

7 AUDITORS

These audits were concluded over a period of 4 (four) days.
We hereby confirm that the above information is true and correct:

21st February 2025 – Krugersdorp, South Africa
