1. APPLICABILITY

- 1.1. This Schedule is applicable to all the Order Forms related to this Service Schedule "0002" for the purchase of Services and/or Deliverables between the Customer and the Provider.

2. DEFINITIONS

- 2.1. Terms used herein but not otherwise defined shall have the meanings ascribed to them in the Agreement.
- 2.2. For the purposes of this Schedule, the following expressions shall have the meanings given to them hereunder:
- 2.2.1. "**DIA**" Dedicated Internet Access means uncontended, unshaped International Internet Bandwidth.
- 2.2.2. "**Effective Date**" means date of signature of the contract;
- 2.2.3. "**Incident**" means any event which is not part of the standard operations or Scheduled Downtime of the Service and which causes, or may cause, an interruption or a reduction of the quality of the service;
- 2.2.4. "**IT Freeze Window**" means a time period that no changes are allowed on the providers or customers network.
- 2.2.5. "**Jitter**" means the variation milliseconds between the slowest and the fastest Packets;
- 2.2.6. "**Latency**" is the time delay experienced for a Packet to traverse from sender to receiver, measured in milliseconds (ms);
- 2.2.7. "**Layer 1**" means a Data Link layer defined by the Open Systems Interconnect Model of the International Standards Organisation;
- 2.2.8. "**Layer 2**" means a Data Link layer defined by the Open Systems Interconnect Model of the International Standards Organisation;
- 2.2.9. "**Layer 3**" means a Data Link layer defined by the Open Systems Interconnect Model of the International Standards Organisation;
- 2.2.10. "**Multiprotocol Label Switching (MPLS)**" means the Service offered by the Provider to the Customer as set out in the Service Schedule;
- 2.2.11. "**Mean Time to Respond (mttr)**" means the mean time to acknowledge the receipt of an Incident notification.

- 2.2.12. **"Mean Time to Repair (MTTR)"** means time lapsed between when a call is logged with the Provider service desk and the time at which the Services are restored to the level it was prior to the occurrence of the fault;
- 2.2.13. **"Network Operation Centre (NOC)"** means a Provider technical facility as designated by the Provider from time to time;
- 2.2.14. **"Packet"** means a parcel of information, which is packaged depending on the transmission medium;
- 2.2.15. **"Connectivity Coverage Maps"** means the simulated active coverage areas in which the Provider is able to supply the Connectivity Service as amended from time to time;
- 2.2.16. **"FTTx"** Fiber to the X location delivered over GPON Technology;
- 2.2.17. **"GPON"** Gigabit Passive Optical Network are networks that rely on optical cables to provide services;
- 2.2.18. **"LTE"** Long Term Evolution is a standard for wireless broadband networks.
- 2.2.19. **"Microwave Connections"** Point-to-point network connectivity using microwave technology.
- 2.2.20. **"Planned Maintenance"** means any preventative, routine or scheduled maintenance which is performed on the Providers Network;
- 2.2.21. **"Point-of-Presence (PoP)"** in the context of this Service Schedule, means a Point-of-Presence specifically relating to the Provider's Network; as set out in the Order Form;
- 2.2.22. **"Scheduled Downtime"** means service downtime that occurs during the Scheduled Maintenance Window;
- 2.2.23. **"Scheduled Maintenance Window"** means the period between 00h00 and 06h00 on Sunday mornings or any other period arranged with the Customer at least fourteen (14) days before Scheduled Downtime commences.
- 2.2.24. **"SD-WAN"** software-defined networking is a virtual Wide Area Network (WAN) architecture that allows enterprises to leverage any combination of transport services.
- 2.2.25. **"Service"** means the service provided as specified in the service order form.
- 2.2.26. **"Service Availability"** means the ability for the Provider to provide the Services to the Customer on a continuous and uninterrupted basis;
- 2.2.27. **"Service Downtime"** means the period of time that the Service was unavailable to the Customer;

- 2.2.28. **"Service Level Agreement (SLA)"** means the guarantees that Provider commits to provide the Customer for services described in the schedule.
- 2.2.29. **"Service Period"** means the total time period of minutes in the month and is calculated using the following formula; $\text{Service Period} = 60 \text{ minutes} \times 24 \text{ hours per day} \times 30 = 43,200$;
- 2.2.30. **"Service Outage"** means an instance when the Customer is unable to route traffic to one or more Customer Premises via the Provider Network, which results in Service Downtime;
- 2.2.31. **"Site Survey"** means a task-by-task process by which the Provider studies the Customer Premises to determine adequate line of site between the Customer Premises and the applicable Provider PoP, the availability of suitable facilities and to determine the appropriate placement of the Network Termination Device;

3. SERVICE DESCRIPTION & SERVICE LEVELS

3.1. Paratus Connectivity Services without Service Level Agreement (SLA)

3.1.1. Service Description

Managed connectivity services provided by Paratus without SLA are included in this schedule.

Connectivity services included in this schedule are;

- FTTx GPON Fiber Connections
- Mobile and Fixed LTE Connections
- Microwave Connections

Services using the above technologies are provided as fixed packages with various options available to customers.

Connectivity is delivered via the Provider's network in accordance with the Provider's Connectivity Coverage Maps and availability.

3.1.2. Service Availability

Standard Service Availability provided for these services is ninety-five per cent (95%).

3.1.3. **Service Downtime**

Downtime shall not include any unavailability resulting from:

- An inability of the Provider to access the Customer's premises for reasons beyond the reasonable control of the Provider;
- Scheduled downtime for Planned Maintenance;
- Interruptions or delays resulting from any third party services; Third Party Services refer to any OTT (Over The Top) services provided by the Provider across the Customer link;
- Any applications, supplies, power; equipment or local access facilities provided by the Customer or their suppliers, which is required in the provision of the Services;
- Any Incident that affects the Service Availability during any period when the Customer elects not to allow Planned Maintenance on the Service at the request of the Provider, acting reasonably;
- Continued interruptions caused by OHS (Occupational Health and Safety) conditions preventing Provider technicians from resolving interruptions;
- Force majeure.

3.1.4. **Monitoring and Troubleshooting**

- 3.1.4.1. The Provider shall provide the customer with access to the Providers portal where the customer can manage the account, view statistics regarding the service and other information, as well as top up data when necessary.
- 3.1.4.2. The tool can also be used to raise alerts with the Provider for support required should the service not be functioning as per specifications.
- 3.1.4.3. Unless any special conditions are stipulated, all systems can be used 24 (twenty four) hours a day on all days of the week.
- 3.1.4.4. Maintenance windows are the only exception. The respective target service availability is measured in a monthly time window and excludes scheduled maintenance windows.
- 3.1.4.5. The Provider will monitor the equipment and work to restore the service in a timely manner.

4. FAULT REPORTING & RESOLUTION

- 4.1. For queries and complaints regarding the Provider's connectivity Services, please call the Customer Support Desk on +264 (0)83 300 1000 or send an email to: support.na@paratus.africa.
- 4.2. When emailing the support address, a support ticket will be raised on the Provider's ticketing system. The ticket reference number will be emailed to the Customer logging the ticket.
- 4.3. The Mean Time to Repair (MTTR) time measures the length of time between the recording of the fault report in the ticket system and the expert, the effective remote or on-site intervention of a service technician for the purpose of remedying the fault.
 - 4.3.1. The maximum MTTR is not guaranteed however the Provider endeavours to remedy the fault within 48 hours.
- 4.4. The Resolution Time commences when a ticket is logged and ends when functionality has been restored. Functionality is deemed to have been restored when the connected systems are able to operate and the Service is available again. The resolution time is not guaranteed.
- 4.5. Completion of the Fault Resolution Process
 - 4.5.1. The successful resolution of a fault is documented in the service request. Once this has been entered, the fault resolution process is complete. The resolution of the fault is reported to the customer on request.
 - 4.5.2. The customer can enquire at the Customer Support Desk at any time regarding the status of the fault resolution or provide feedback about the fault resolution, quoting the service request number.
- 4.6. Should a call logged not be handled to the reasonable satisfaction of the Customer, the Customer shall be entitled to direct their concerns in accordance with the escalation matrix as set out in Annexure A below.
- 4.7. In addition, the Customer shall be entitled to approach an assigned Provider account manager if the feedback or progress on the outage resolution is not satisfactory.

5. SERVICE PROVISIONING

- 5.1. The Customer shall ensure that the Customer's Premises at either end of a Service for which the request has been made are accessible at any reasonable time as may be required by the Provider to fulfil its obligations in terms hereof.

6. SCHEDULED MAINTENANCE

- 6.1. Planned Maintenance which falls outside the Scheduled Maintenance Window due to critical nature will be arranged with the Customer at least forty-eight (48) hours before the Planned Maintenance commences.
- 6.2. The Provider shall notify the Customer of any planned maintenance which falls inside the Scheduled Maintenance Window at least fourteen (14) calendar days before the Planned Maintenance commences.
- 6.3. Critical Maintenance means any maintenance in which the Provider is unable to forewarn its customers. This Critical maintenance can occur immediately, during any time of day and is usually due to factors outside of the control of the Provider. The Provider reserves the right to have this Critical Maintenance considered as part of the Service.
- 6.4. Emergency Maintenance means any planned maintenance, under the control of the Provider whereby the Provider will endeavour to inform its customers 12 (twelve) hours prior to the maintenance being performed and ensuring that such Emergency Maintenance is performed during the hours of 22h00 and 06h00 the next morning. The Provider reserves the right to upgrade this emergency maintenance window to Critical Maintenance without further notice to the customer being required.

ANNEXURE A: ESCALATION MATRIX & FAULT REPORTING PROCEDURE

Here to Help

Dear Valued Customer

Paratus provides the following tips to make your user experience a breeze when logging a query with our dedicated 24/7 Customer Support Team

FOR QUERIES

1

Call +264 83 300 1300

2

Visit na.paratus.africa/helpdesk

3

Email support.na@paratus.africa

Services are only available where Paratus has Network Coverage. T's & C's Apply.
